

CB UBEC V1

Our CB UBEC V1 is a compact DC-DC converter that step down high-voltage power sources, like LiPo batteries, to two stable 5V 5Ampere outputs. It is designed for drones, RC models, and embedded systems, offering consistent and efficient power for your electronics.

- Stable & Regulated Power
- High Efficiency
- Overvoltage & Surge Protection

Specifications

Operating Voltage	3-14 S
Max Input Voltage	60V
Current Range	Upto 5 Amps each
Size	54 x 37 x 13 mm
Temperature Range	-10 to 55 °C
Weight	28 grams
